2. Citations and explanations (Rule 70.7)

The documents cited in the international search report do not disclose an energy-saving dimming apparatus and method that can be used to convert a wide range of existing "non-dimmable" electric lighting products and systems into "dimmable" ones, as the present application does.

So claims 1-28 comply with PCT Article 33(2),(3),(4), that is, have the novelty, inventive step and industrial applicability.
